

MY-CLOSURE help v1.0

1 Installing MY-CLOSURE

The application is standalone but if you are having problems running it please ensure you have the latest Java Virtual Machine (VM) which is available from <http://www.java.com/en/download/index.jsp>.

Once you have a suitable Java VM installed, download the RAR file called MY-CLOSURE.rar containing MY-CLOSURE program and its dependencies. Extract CLOSURE.rar and place the file MY-CLOSURE.jar within it into a directory.

2 Running the program

2.1 Command line argument syntax

Open a command line window, and go to the directory where you placed the MY-CLOSURE.jar.

Type in: `java -cp MY-CLOSURE.jar qiong.project.application.ApplicationController my [INPUT] [OUTPUT]`

Example:

```
java -cp MY-CLOSURE.jar qiong.project.application.ApplicationController my  
a.nex out.nex ,
```

where the input file is “a.nex” in the current directory and the output will be saved as “out.nex” in the current directory.

2.2 Note

Please note that the format of the input file must closely follow the examples provided on the webpage.
